INDEX REFERENCES BY BRANDS

NO LABEL : Orange references are No Label products : without brand label at neck for easy relabelling.

NEW : Light blue references with NEW are 2024 new products.

B&C • The Belgian brand offers all the advertising textiles essentials. B&C Collection combines competitive prices and fashionable style on a collection designed to open up new commercial opportunities. With an extensive collection of t-shirts, polo shirts, shirts, sweatshirts, jackets, fleece jackets and professional workwear in a huge palette of 130 different colours. Committed to quality, the ranges of B&C Collection t-shirts, polo shirts, sweatshirts and shirts have OEKO-TEX® Standard 100 certification. The company works to promote sustainable development, which is reflected in its support for and participation in initiatives such as the Fair Wear Foundation, Textile Exchange, United Nations Global Compact, amfori BSCI, BCI (Better Cotton Initiative) and Peta-approved VEGAN.

KARIBAN PREMIUM • Kariban Premium creates high-quality pieces to meet exacting standards, with a focus on Merino wool and Supima® cotton. The brand focuses on simplicity, precise cuts and impeccable finishes for a refined, customisable style. Adopting a minimalist approach with no labels but a size tag, it targets various sectors such as corporate, hospitality, real estate and finance. Kariban Premium is the epitome of elegance and quality, enriching its selection this year with new coats and a bodywarmer.

NATIVE SPIRIT • Native Spirit offers a complete range of quality blank garments developed according to demanding sustainability criteria and in line with professional eco-responsibility expectations. The brand develops timeless, sustainable designs with decoration access, available in a range of colours inspired by nature, in line with ethical criteria. 100% no-label clothing that combines sporty elegance with refined features, made entirely from premium, organic, recycled and/or plant-based materials. Taking this one step further, Native Spirit designs ranges that are made in Europe, reflecting its desire to be part of a more virtuous fashion industry, as well as a selection of products that are traceable using AWARE technology™ in order to monitor the end-to-end impact of textiles.

U-POWER • U-Power is a specialist workwear brand that offers safety shoes and workwear designed in Italy. The brand has taken the workwear market by storm by proving its excellence in safety shoe and boot design. Manufacturing boots since 1950, the brand is backed by genuine expertise in the field. Originally specialising in sports shoes, the brand has begun to focus on workwear, combining comfort and the style of a running shoe with the safety of a work shoe. The brand's strength lies in the development of cutting-edge technologies that allow the U-Power range to be high-performance. U-Power does not stop there, however, also offering a wide range of technical workwear so you can create a total look. Find all your workwear must haves, such as softshells, bodywarmers and multi-pocket trousers, etc.

TIMBERLAND PRODUCTS
ON OUR WEBSITE

OUR COMMITMENTS TO THE APPEAL, QUALITY AND ECO-RESPONSIBILITY OF OUR PRODUCTS.

We want to offer you the best corporate wear and accessories with fashionable products, quality that is constantly improving and increasingly environmentally friendly characteristics. We will continue to develop these characteristics in order to accentuate the responsible nature of our practices.

With this aim we encourage our partner brands to adopt an approach to product certification that complies with the most advanced standards in the textile industry.

Organic cotton textiles.

Organic cotton is grown without pesticides, GMOs or chemical fertilisers.

In terms of certification, the GOTS label (Global Organic Textile Standard) guarantees that the textile fibres used are organic. It ensures the traceability of raw materials and their origins, as well as guaranteeing good social and environmental practices. It is the most comprehensive and strictest certification.

The OCS label (Organic Content Standard) requires third-party organisations to certify the origin of raw materials as well as the amount of organic matter in a finished product. It therefore guarantees the traceability of raw materials throughout the manufacturing process.

Recycled materials.

The GRS label (Global Recycled Standard) certifies the recycled content of a product. It also validates compliance with social and environmental criteria, while imposing restrictions on the chemical composition of products.

The RCS label (Recycled Claim Standard) guarantees that a product bearing this certification contains at least 5% recycled materials. Each stage of production must be certified, from fibre recycling to manufacturing.

Post and pre-consumer recycled material.

POST-CONSUMER RECYCLED MATERIALS

Materials that come from consumption waste generated by households or by industries and businesses in their role as end-users. This includes returns of materials from the distribution chain.

PRE-CONSUMER RECYCLED MATERIALS

Materials that come from waste generated during a manufacturing process. Excluded is the reuse of materials that come from a production process and that can be recovered in the same process that generates them.

Recycled materials Bottles

This picto indicates the number of 500ml or 1L plastic bottles that have been reused to make the post-consumer recycled polyester of a product.

Confidence textile.

The **STANDARD 100 by OEKO-TEX®** label guarantees that tested and certified items do not contain harmful substances in proportions that could be damaging to health.

Animal protection.

The French **Eve Vegan** label certifies that a product has been produced without any trace of animal matter (from breeding, slaughter, hunting or fishing). It also guarantees that products have not been tested on live animals.

PETA approved vegan (People for the Ethical Treatment of Animals) is an international animal welfare certification. It demonstrates that a product has not been tested on animals and does not contain any ingredients of animal origin.

Responsible wool.

The Responsible Wool Standard (RWS) label guarantees the welfare of sheep used in wool production.

French Origin Guaranteed.

This short circuit label guarantees that a product has been made in France. At least 50% of the product's manufacturing costs (including raw materials) are of French origin.

OUR RESPONSIBLE PURCHASING APPROACH CONTRIBUTES TO THE SUSTAINABILITY OF THE TEXTILE SECTOR.

In a complex and ever-changing world, controlling our supply chain is vital when it comes to being increasingly comfortable with the impact of our business on society and the future of the planet. This is why we favour partner brands that share our goal of producing in a responsible and sustainable manner.

For this reason we ask them to adhere to internationally recognised principles and standards concerning:

- **Respect for human dignity and the protection of human rights.**
- **The International Labour Organisation's (ILO) regulations, and in particular:**
 - The fight against child labour, forced labour, harassment, abuse and discrimination;
 - Freedom of association and collective negotiation, decent wages and benefits, reasonable working hours, hygiene, health and safety of personnel.
- **The protection of human health and the environment, in particular:**
 - The implementation of effective environmental policies as well as the use of sound technologies and practices throughout the product life-cycle;
 - The optimisation of the use of water and all natural resources as well as energy consumption;
 - Actions to support biodiversity and the fight against pollution in all forms (air, soil, water);
 - The circular economy by working to minimise the production of waste (including wastewater) and to maximise recycling.
- **Ethics and professional integrity by acting loyally when it comes to markets/contracts and by respecting the rules of free and fair competition.**

To demonstrate compliance with these requirements, we encourage our partners to adopt the following approaches:

- Membership of internationally recognised bodies such as the Global Compact;
- Corporate Social Responsibility (CSR) assessments such as Afnor/Acesia, Ecovadis, ISO 26000, etc.;
- Obtaining social and environmental certifications, independently or for sites where their products are manufactured, based on standards such as SA 8000, ISO 45001, ISO 14001 or equivalent, as well as those based on audit reference systems such as Amfori/BSCI, WRAP or SMETA (SEDEX), or equivalents.

COTTON "IN CONVERSION" POSITIVE TRANSFORMATION

Currently only 1% of world cotton production is organic.

We support our partner brands that are committed to the deployment of «In Conversion» cotton. A comprehensive and sustainable programme that seeks to improve the quality of life of producers so that they can gradually switch from conventional to organic cotton.

Confronted with strong demand and soaring prices for this raw material, growing "In Conversion" cotton is an effective strategy designed to gradually increase the world supply of organic cotton and thus help preserve the planet.

3 YEARS

It takes 3 years to rid conventional cotton plots from traces of pesticides and to regenerate.

From the first day of this transition programme, production scrupulously complies with the standards required by the organic sectors.

CONVENTIONAL FARMING

ORGANIC FARMING
IN CONVERSION

ORGANIC AGRICULTURE

Albino Stock / #523884074

FROM CONVENTIONAL COTTON TO ORGANIC COTTON

Investment in organic farming involves financial support for producers, training and technical assistance that combines traditional and modern organic methods. The programme contributes to improving the quality of life of producers, pushing them to move towards sustainable agriculture. It is an essential partnership to bring about real change for the future, and to ensure that everyone benefits.

The mission of the certification bodies is to assist, supervise and rigorously control all the actors of the textile industry. They ensure that the following points are respected:

The different stages of this biological transition

Natural cotton seeds

No pesticides

No GMOs

No chemical fertilisers

Crop rotation culture

Sustainable use of resources

Understanding the differences between conventional cotton and organic cotton

	Cotton	Organic cotton

The «ORGANIC COTTON IN CONVERSION» pictogram will allow you to easily find the products organic cotton products in conversion.

KARIBAN BRANDS' CSR COMMITMENTS

Environmental and social commitments lie at the heart of KARIBAN BRANDS. We always try to go one step further by emphasising the idea of eco-responsibility in our production process.

We act in three particular ways:

- to promote the choice of sustainable materials
- to highlight the value of expertise
- to optimise local supply networks

The brands are expanding our wardrobe with new styles made from natural and virtuous fibres such as organic cotton certified by Ecocert Greenlife. This approach helps to protect the environment and support the people who work hard to add that special something to our collections. At the same time, we are developing clothing made from recycled materials such as recycled cotton and recycled polyester.

KARIBAN BRANDS

KARIBAN BRANDS reviewing our production methods in order to create sustainable alternatives and plan for the future.

Societal values and safety are our priority, and closely monitor the production of the factories with which we work in order to guarantee compliance with the quality charter on which our collaboration is based.

The group promotes manufacturing workshops in European Union countries. The unique know-how of the European factories they have selected brings added value to our products, in terms of both quality and human diversity. The techniques used, the expertise at every step in the manufacturing process and the artisanal touch are a huge plus and a sign of quality.

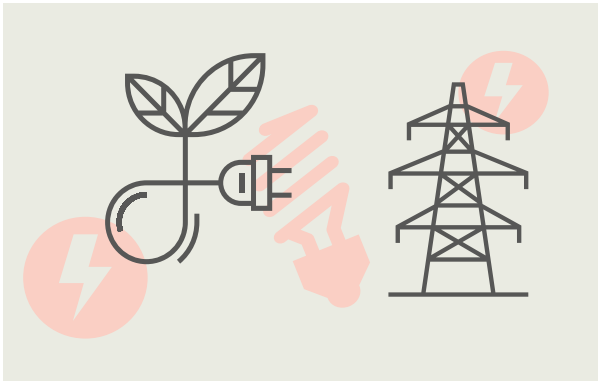

By opting for local supply networks, KARIBAN BRANDS minimise the environmental footprint and prioritise the local economy. What's more, fostering links between neighbouring countries also helps to increase the use of local or eco-designed materials for ethical fashion.

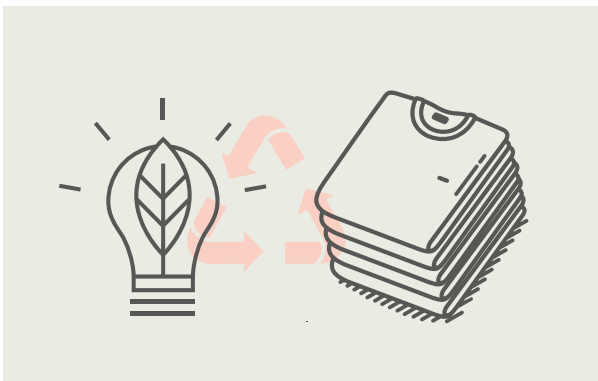

Commitments and positive changes at the heart of the organisation

KARIBAN BRANDS strives for improvement and excellence through the implementation of an assessment, progress plan, codes of conduct, labels and/or standards with certifications that provide recognition of its efforts and commitment. They have gradually implemented actions and tools that support sustainable development:

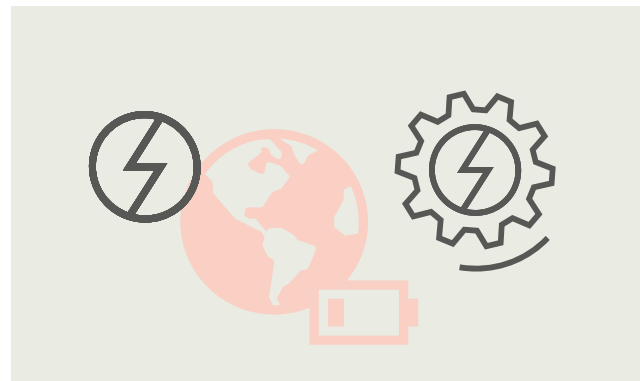

Preserving resources

We have implemented an audit that aims to guarantee improved control of energy consumption (gas, electricity, fuel), to preserve the planet's resources.

Minimising plastic packaging

To combat problems linked to plastic pollution, they have significantly reduced the use of polybags and modified some of our packaging by moving towards recycled models.

Carbon footprint

We are working to reduce our carbon footprint, reflecting the effort made in the fight against climate change. This ongoing process constitutes a powerful diagnostic tool for direct and indirect greenhouse gas (GHG) emissions generated by every sphere of the company's business.

KARIBAN BRANDS is committed to a lasting positive impact on the environment.

The group encourage and ask our employees for their input. All ideas for improvement are studied and considered.

THE K-LOOP PROJECT

Kimood and K-up, **KARIBAN BRANDS'** specialist luggage and headwear brands, have joined forces to launch a joint circular economy project, K-loop.

Respect for the environment and traceability are the keywords of the K-loop project, which combines the use of recycled and organic materials, allowing transparent tracking of every step in a product's creation for the end consumer.

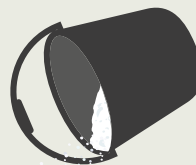

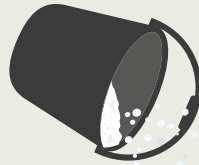

This traceability is made possible by **AWARE™** technology. This involves combining tracers (microparticles) with a secure, neutral storage solution (blockchain).

The tracers are added to the fibre when the product is made, giving it a unique digital identity, its digital passport. This technology proves the authenticity of a product.

AWARE™ Technology

KARIBAN
BRANDS

Sustainable materials
(from **KARIBAN BRANDS**
textile scraps
and recycled
plastic bottles).

AWARE
THE TRUE STORY OF RECYCLED FABRICS

AWARE™ tracers
(microparticles).

1

Step 1

The recycled fibre is blended with tracers in the form of imperceptible microparticles.

2

>> A digital passport for the recycled fibre is issued. Secure storage in the blockchain (storage and information transmission technology).

Step 2

Garment woven from recycled/traced fibre.

3

Step 3

Finished product scan.

4

Step 4

Authentication: the scan detects the fibre that has been recycled, traced and stored in the Blockchain.

EXPLANATIONS OF PRINTING PROCESSES

Customising a garment takes real expertise. Designers have the special skills required to create a textile communication that reflects your company's image.

From embroidering a pattern on a cap to screen-printing a brand logo on a t-shirt or flock printing a sports top...

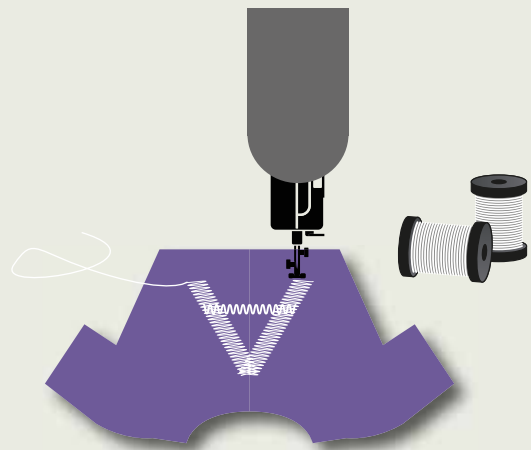

Your professional partner will suggest the most appropriate technique according to the material, the desired result, the quantity to be customised and your budget.

7 TECHNIQUES ... REAL EXPERTISE!

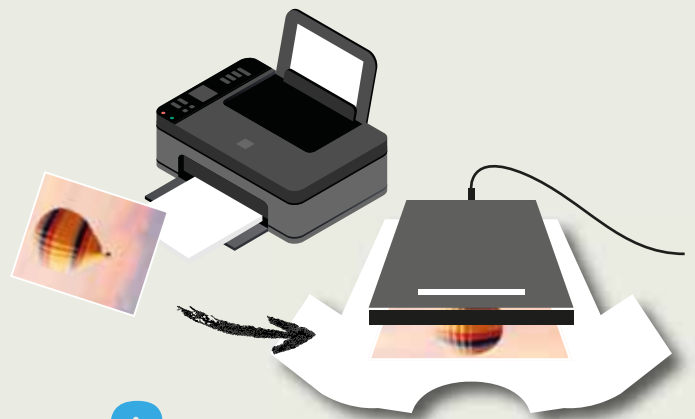

1 SILKSCREEN PRINTING:

Silk screen printing is the most commonly used printing technique. It has been around for many years and is inspired by the ancient stencilling method. The ink is deposited directly onto the textile through a screen with a cut-out design. This technique is recommended for high volumes and is ideal for promotional textiles. It can be adapted ideally to different materials.

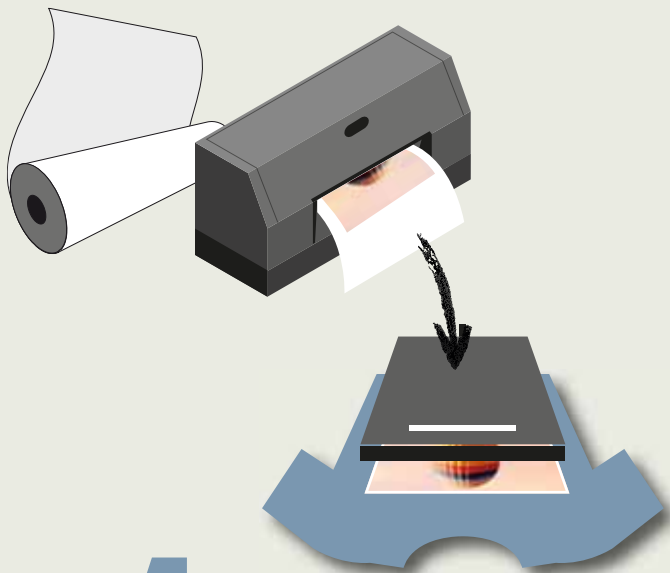

2 EMBROIDERY:

Embroidery is the highest quality and most enduring decoration technique. It creates a sophisticated look and a unique texture. Industrial machines and high-quality thread provide incredible durability and high resistance to washing. It can be applied successfully on a wide variety of materials from 180 gsm (fibre weight).

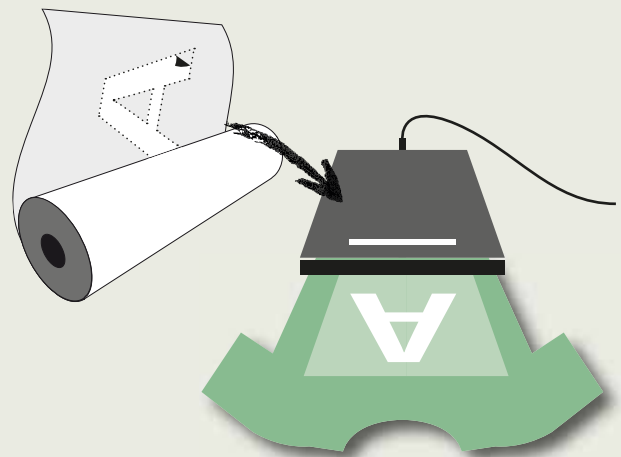

3 SUBLIMATION:

Sublimation is a transfer textile printing technique. The pattern is first printed onto a transfer sheet which is then applied to the textile in a heated process. The ink reacts to the pressure and heat by transforming from a solid to a gaseous state and is then imprinted enduringly in the fibre. It is essential to use this technique on polyester. The higher the proportion of polyester, the higher the quality and the longer the printed pattern will last. This method is popular as it does not affect the breathability of the print.

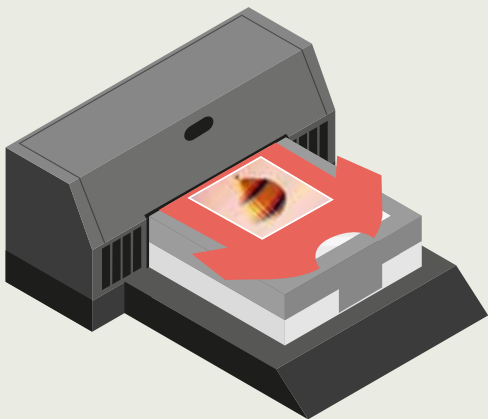

4 DIGITAL TRANSFER

Digital transfer is a flock printing system. It is applied using a digital print on heat-seal paper. When the print is ready to apply, it is pressed onto the garment to be customised. This results in a perfect reproduction of the pattern. This process represents an ideal compromise as it offers a high-quality result for a lower cost in comparison with other techniques.

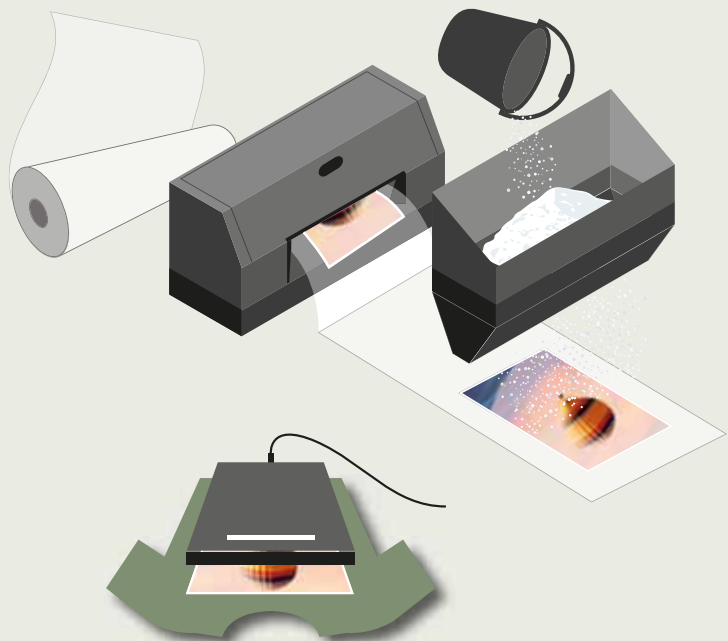

5 VINYL TRANSFER

Vinyl transfer is a flock printing system that is often used to customise textiles. This technique involves gluing a vinyl material to a fabric using a hot-pressing system. The pattern is first cut out using a plotter and then heated to bond the adhesive to the fibre. This method can be used to customise areas where printing would be difficult and to reduce the cost of the process.

6 DIGITAL PRINTING - DTG

Printing directly onto textiles, also known as DTG (Direct to Garment) printing, is the most innovative technique. It works according to a similar principle as an inkjet printer. Fine drops of ink are sprayed directly onto the textile. These drops are then absorbed by the fibre to create a very precise result. This process is considered to be faster and higher quality than certain traditional silkscreen printing techniques. The pattern imprinted in the fibre lasts wash after wash. For optimum results, it is advisable to use this method on fabrics with a cotton content of at least 70%. It is generally used on lightweight fabrics and to create large patterns.

7 DIRECT TO FILM (DTF)

This is an automated silkscreen printing transfer technique. The image is first printed onto a PET film. A hot-melt powder is then applied to the image and heated. Finally, the printed film and the melted powder are placed on top of the fabric and hot-pressed. This method can be used to apply decorations to all types of textile. The decorated fabric feels very light and the pattern is precise, resistant and hard-wearing.

Native Spirit is first and foremost a range of customisable on-trend essentials, developed with exacting sustainability criteria to make desirable fashion sustainable. Ever since it was founded, the brand has been committed to designing quality garments that stand the test of time, meeting the expectations of professionals in terms of eco-responsibility.

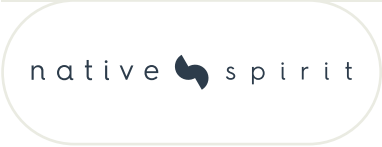

The brand develops timeless styles for men, ladies and kids in a palette of colours inspired by nature. Nature plays a part in every stage of the collections' development, guiding the choice of shades, materials and production methods to comply with the need to help make fashion more responsible.

Made with care.

Always innovative and striving for the best, Native Spirit places materials at the heart of the design process and offers garments made entirely from organic, recycled and/or plant-based materials. An ethically and responsibly certified collection, approved by some of the most reliable labels on the market. In 2024, items traceable using Aware™ technology will be included in the selection for greater transparency, offering complete visibility of the production process.

Designed to give free rein to creativity, Native Spirit has developed a complete eco-responsible wardrobe using materials and finishes specifically chosen to facilitate customisation and all types of textile branding. A complete range of 100% no-label blank apparel, designed to bring the most creative projects to life.

This product is traceable thanks to Aware™ technology.

From the start of the production process, Aware™ physical tracers, which act as a unique fingerprint, are integrated into the raw material. These tracers carry a unique, tamper-proof code, enabling the product to be authenticated by an Aware™ scanner. This information is then recorded in the blockchain, enabling the life of the product to be traced. The data is made public by a QR Code affixed to a label that gives access to the garment's digital passport, offering complete visibility of the production process and guaranteeing transparent management of the textile supply chain.

HOW TO CHOOSE A T-SHIRT

STEP 1: COMPOSITION

Choosing the composition can be an important step when selecting your products.

Cotton, Polyester or Polycotton?
What to choose according to your needs

Cotton, polyester or polycotton?

	What's this?	+	-
COTTON	Natural plant fibre	<ul style="list-style-type: none"> • Highly absorbent • Comfortable, soft feel • Resistant to high-temperature washing • Does not create static electricity 	<ul style="list-style-type: none"> • Tendency to shrink • Dyes fade over time • Moisture-sensitive
POLYESTER	Synthetic fibre	<ul style="list-style-type: none"> • Extremely hard-wearing • Does not crease • Wicks away sweat, perfect for sports and work • Easy-care, lightweight and warm • Does not fade over time 	<ul style="list-style-type: none"> • Oil or grease stains cannot be removed • Creates static electricity • Highly absorbent

	100% cotton.	100% polyester.	Polycotton (primary polyester material)
Comfort	***	**	***
Easy care	*	***	***
Colour fastness	*	***	***
Dimensional stability	*	**	***
Absorption capacity	***	*	**
Abrasion resistance	*	***	***

* good ** very good *** excellent

STEP 2: WHAT ARE THE CHARACTERISTICS OF 100% COTTON YARN?

One of the most important characteristics of a 100% cotton t-shirt is the length of the fibres used in the weave. Fabrics made from long fibres are thought to be better quality. This is an important element, which can be used to measure a product's quality, printability and durability.

Overview

Carded cotton is obtained using a carding machine to disentangle and air the raw fibres. It produces a matte fabric that feels slightly rough to the touch. This short-fibre fabric is more cost-effective.

STEP 3: CARING FOR A T-SHIRT

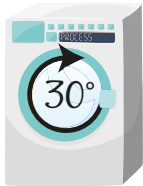

Whatever its composition, a t-shirt requires specific care to ensure its longevity wash after wash, especially if it is decorated with branding. The secret is simply to read the recommendations on the manufacturer's label, usually found on the inside of the t-shirt, before washing. Every fibre is unique and reacts differently to washing and drying.

A few tips to remember:

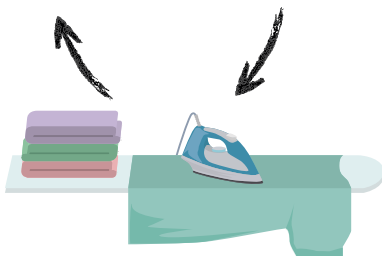

100% COTTON

There are **three golden rules** to protecting the delicate fibre of a cotton t-shirt:

Wash the t-shirt inside out at 30°C.

Dry in the open air on a line or on a hangar.

Iron the t-shirt inside out, at a medium temperature and without steam

SYNTHETIC POLYESTER / POLYCOTTON

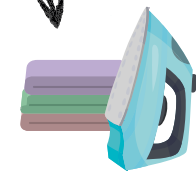

The resistant fibres of synthetic t-shirts (polyester and polycotton) still require suitable care to protect the fabric over time.

Whether you wash them by hand or in the machine, keep the temperature below 40°C. Select the synthetics programme on your machine.

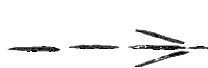

Using a tumble dryer is not recommended.

Iron at low temperatures.

different yarn properties.

Combed cotton

After carding, the yarn is passed through a combing machine to remove the short fibres. This gives the finished fabric a silkier feel, making it softer, more resistant in the wash and more hard-wearing. It ensures smooth surfaces for decoration access

Ringspun combed cotton

undergoes a final step before the fabric is woven. The fibres produced during combing are thinned and twisted, which produces a softer, more resistant yarn that is less susceptible to shrinkage. Ideal for high-quality printing.

Pre-shrunk combed cotton

can be pre-shrunk using a finishing treatment called sanforisation. This reduces the risk of shrinking in the wash for longer-lasting clothing. It is a sign of quality and durability.

HOW TO CHOOSE A POLO SHIRT

STEP 1: COMPOSITION

Polo shirts are made from three types of material: cotton, polycotton and polyester.

What are their properties and benefits?

COTTON, POLYESTER or POLYCOTTON?

COTTON

The 100% cotton polo shirt is the most popular polo shirt simply because of its strength and durability. Long fibres are preferred to short fibres to prevent pilling after a number of washes. It is also very comfortable and has the ability to wick moisture. The fibre absorbs the water released by the skin to give the wearer a feeling of well-being.

POLYESTER

The 100% polyester polo shirt is often used when playing sport because the fibre absorbs less moisture from the skin and therefore promotes drying. It is often combined with fibre treatment technologies such as "cool plus" that allow it to dry even more quickly and limit odours. Its creasing is minimal, it rarely shrinks and it is resistant to stubborn stains.

POLYCOTTON

A mixed polo shirt benefits from the advantages of both cotton and polyester. It combines the resistance of cotton with quick-drying polyester. It is often seen as a good compromise at a mid-range cost.

STEP 2: KNIT

JERSEY

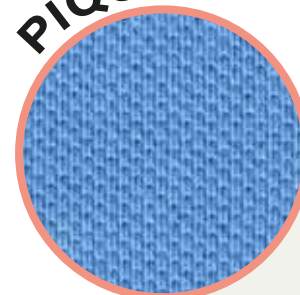

2 different faces: the right side is smooth while the wrong side looks like a wave with a line through it. Knit generally used for making t-shirts.

- Smooth surface
- Easy printing
- Flexibility and softness

PIQUET

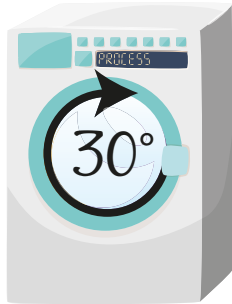

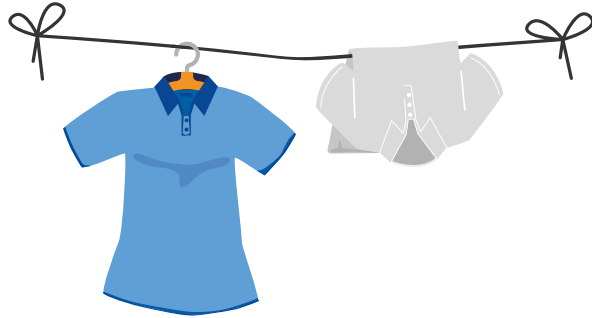

STEP 3: CARING FOR A POLO SHIRT

The way in which a polo shirt is woven and its unique appearance require special care. Polo shirts are usually resistant to washing.

1 MACHINE WASH

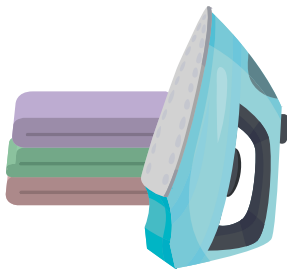

2 DRYING

When washing a polo shirt, choose a short machine cycle at 30 °C. There is no need to add fabric softener. In fact, this would not make the fabric any less rough and could risk damaging the fibre. Hand washing should be avoided because it does not allow you to control the temperature of the water, the time or the amount of detergent.

Using a tumble dryer is not recommended as this would damage the fibre and cause your polo shirt to shrink. Air drying is preferred. There are two suitable ways to dry a polo shirt:

- Hang the polo shirt on a rack under the sleeves
 - Put the polo shirt on a plastic hanger.
- DO NOT USE CLOTHES PEGS as they may distort or mark the fabric.

3 IRONING

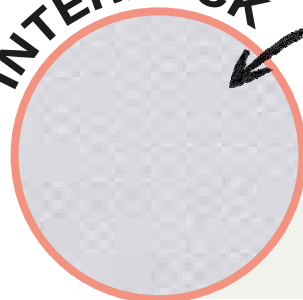

You should iron a polo shirt carefully. We recommend using a lower-heat iron, set to "cotton, wool and viscose". Polo shirts should be ironed inside out to avoid scuff marks.

Diamond-shaped, relief, aligned stitch and even square motifs. The most commonly used knit for making polo shirts.

- Stretchy
- Easy-care
- Flexible and soft

INTERLOCK

2 smooth faces: the right side has the same look as jersey, the wrong side is ribbed. Double-face knit, twice as thick and heavy as single-knit jersey.

- Naturally stretchy
- Stable during printing
- No transparency
- Does not pill

HOW TO CHOOSE A SWEATSHIRT

STEP 1: WHICH COMPOSITION?

Cotton or polycotton sweatshirt?
Your choice will depend on your needs and expectations for this garment.

What are the differences between these two types of composition?

COTTON OR POLYCOTTON?

COTTON

A cotton sweatshirt feels pleasantly soft. It is comfortable to wear as it is highly absorbent and insulating. It does not scratch or irritate the skin and hangs perfectly.

POLYCOTTON

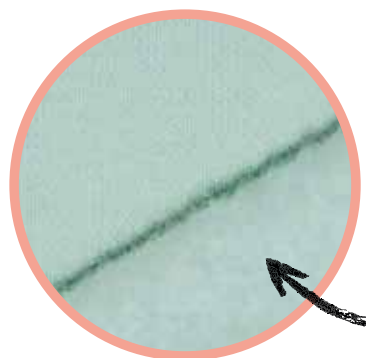

Polycotton sweatshirts are considered to be hard-wearing. The polyester content gives the fibre elasticity. This creates a garment offering greater stretch for more freedom of movement and it pills less easily than 100% cotton.

STEP 2: WHICH KNIT?

Whether it is made from 100% cotton or polycotton, a sweatshirt can be described in different ways. These depend on its design (2 yarn - 3 yarn) and, in some cases, any treatment that may have been applied before assembly.

1

BRUSHED FLEECE

Brushed fleece is very **soft and cosy**. The inner material is brushed to create a pleasant downy effect. It can be designed with 2 or 3 yarns. 3 yarns, consisting of 3 layers, has low shrinkage:

- **Outer layer** 100% combed cotton for a smooth look
- **Intermediate layer** 100% polyester for resistance
- **Inner layer** of polycotton for softness.

LSF

LST

LSI

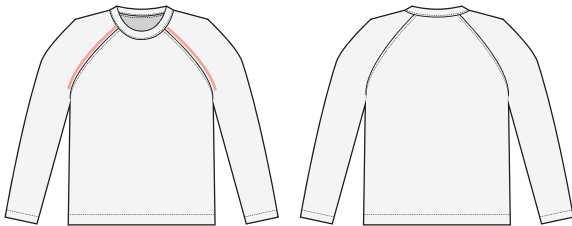

Low Shrinkage is a technology used to ensure the durability of a sweatshirt. The fabric is treated before being assembled to reduce shrinkage. This process is carried out using 2 industrial machines. The compactor applies a wet treatment to the fabric to reduce the shrinkage rate. The stenter applies a heat treatment to stabilise the material.

STEP 3: CHOICE OF SLEEVES

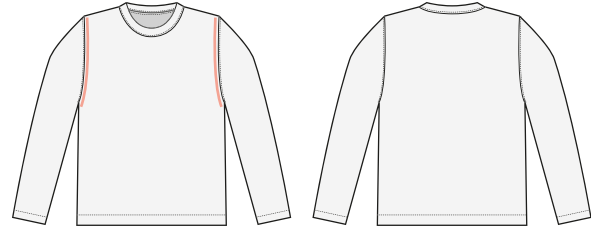

When choosing a sweatshirt, the type of sleeve is an essential factor. The decision will be determined by the intended use for the garment and style preferences.

Raglan sleeves or set-in sleeves?

RAGLAN SLEEVES

Raglan sleeves offer great **freedom of movement**. The sleeve goes all the way up to the neckline, stitched diagonally from the underarms to the collar. This trendy cut is also popular for sports clothing as provides optimum comfort and freedom of movement. The sweatshirt can be slipped on easily and areas of friction are reduced.

SET-IN SLEEVES

Set-in sleeves are the most common and classic style. The sleeve cap follows the armhole from the underside of the arm up to the shoulder. It **adapts to the rounded shape of the shoulder**. It is important to choose the best size for each body shape to allow ideal freedom of movement.

2

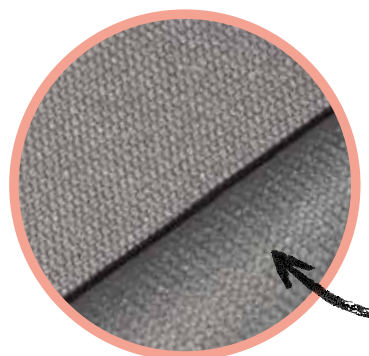

FRENCH TERRY

The unbrushed fleece, also called terry or **terry jersey**, does not undergo any brushing step. The fiber loop remains intact and visible like a less dense bath towel. The interior is less soft than the scratched one. The material is lighter and **more breathable**. It is made of 2 or 3 threads and can be 100% cotton or polycotton.

3

INTERLOCK

Interlock is a fabric worked in **double thickness** using one thread. It can be identified by the little 'V's on both sides. The knit is compact to provide durability and a **silky look**. It is usually made from cotton and might also contain polyester for greater **resistance**.

EXPLANATIONS SOFTSHELL JACKET

STEP 1: MATERIALS

Softshells are jackets made from **soft, flexible stretch material**. They are **comfortable, ergonomic** and provide good freedom of movement. They are ideal for use outdoors as they provide effective **insulation** from the cold and their breathable properties help to regulate **air circulation**.

One of the most important features of **these technical jackets** is their **wind-breaking** properties.

Their **water-repellent coating** provides protection from showery weather. Overall, the softshell is an excellent alternative to both heavy jackets and traditional lightweight wind-breakers. They come in 2 types, **2-layer and 3-layer**.

STEP 2: CUTS

A softshell jacket usually has a **tailored fit**. Several cuts are available to meet different needs.

Bodywarmer/vest

Jacket without hood

Hoodie

STEP 3: CARE

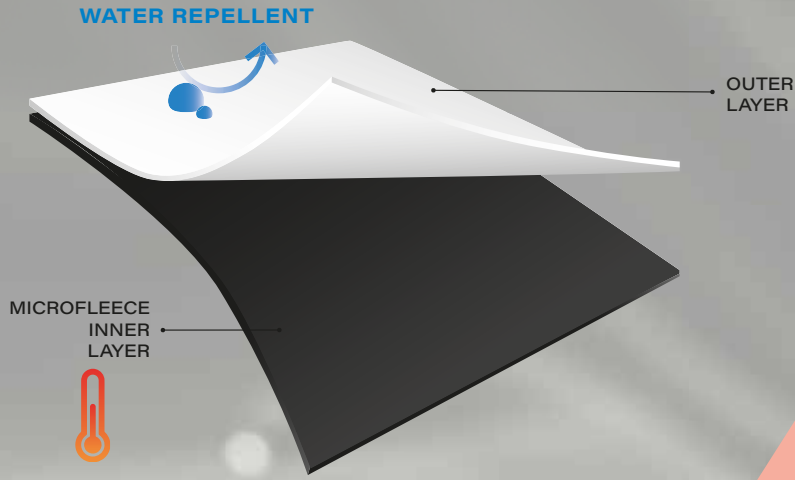

It is absolutely possible to wash a softshell, in fact this is even recommended. Cleaning will remove dirt that could otherwise impair its technical features. However, **washing must be occasional**. A softshell can be machine-washed at a low temperature, no higher than **30°C**. Use a **delicates programme**. Do not put a softshell through a spin cycle or dry it in a tumble drier.

GOOD DEALS

CHOOSING THE RIGHT SHIRT

STEP 1: MATERIALS

When choosing a shirt, the first thing to consider is the material. There are lots of different types and each has its own specific characteristics. Material quality is a key factor in your decision.

WHAT TYPES OF MATERIALS AND WEAVES?

POPLIN:

Lightweight, supple and fluid, poplin shirts are easy-care, elegant and versatile.

OXFORD:

Extremely robust "relief" fabric. Easy-care, Oxford shirts are resistant to dirt and wear.

COTTON ELASTANE:

Fabric designed to offer greater freedom of movement while remaining fitted in all circumstances. Perfect shirts for a professional environment.

TWILL:

The material is characterized by its fine, hanted stripes and is soft and lupte, yet very robust and subtle shine.

MICRO TWILL:

The micro twill is a lighter and higher quality alternative to the classic twill.

LINEN:

Perfect for summer, its fibre does not pill and offers greater breathability. easy-care, it softens and becomes more supple over time.

DENIM:

Very tight 100% cotton fabric and robust. Timeless, must-have shirts.

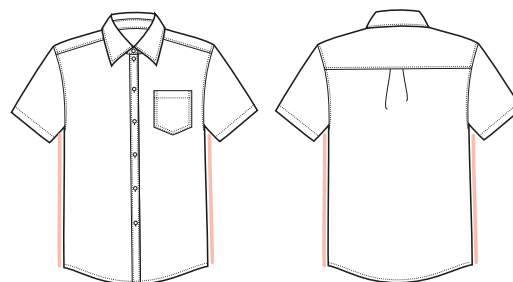

CHAMBRAY:

100% cotton fabric with alternating blue and white threads giving it texture and a decorative feel. Shirt in lightweight canvas material with a denim effect.

STEP 2: CUTS

The cut of a shirt is important as this needs to be suitable for the intended use and the wearer's body type.

STRAIGHT

Straight fit, also referred to as: regular, comfortable and classic. This relatively wide fit is suitable for all body types.

STEP 3:
FINISHES

1 COLLARS

Collars exist in a variety of types which give garments different styles. From the familiar French collar to the original look of the Mandarin collar.

The French collar:
The most common style. Perfect for every occasion, suits a casual business look.

Buttoned neck:
Casual style and excellent fit thanks to this dynamic collar inspired by sports polo shirts.

The cutaway collar:
Wide neck opening and short points for incredible elegance.

The Mandarin collar:
No flap for a sophisticated and minimalist style.

Collar stays are sometimes added at the tips for more support and a chic, dressed-up look.

2

CUFFS

With rounded edges

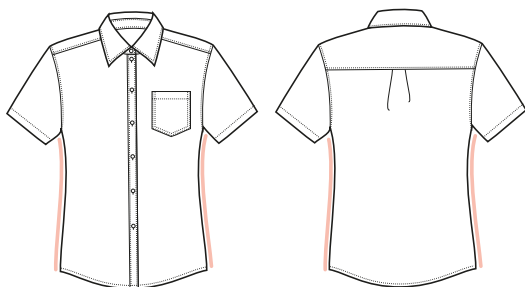

With square edges

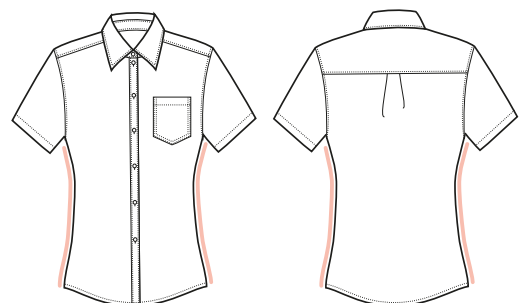

With cut edges

SLIM

Tailored fit
The tailored fit is both comfortable and elegant. It is relatively close-fitting, but does not impede ease of movement.

FITTED

Slim fit is a close-fitting cut that hugs the body perfectly. It features a nipped-in waist and smaller armholes to emphasise the shoulders and chest.

The stretch fabric of these work trousers moves simultaneously in all four directions, ensuring maximum freedom of movement. Water-repellent, quick-drying, highly breathable work trousers. Central zip fastening with scratch-resistant rubber button. Heel cup and accentuated back panel for better protection of the lumbar region. Harmony are men's work trousers with a host of pockets for functionality and practicality: two large front pockets, two multifunctional front pockets with zip fastening, two back pockets, one with a zip and one with Velcro, ruler pocket, hammer holder and kneepad pockets. The reflective strip on the rear tubular buckle ensures improved visibility.

NEW

UPFU280 **QUICK DRY**

ARES SHORTS

140 gsm - 86% nylon, 14% spandex. Work shorts with jogging cut and elasticated waistband for comfort and well-being throughout the working day. Stretch Bermuda shorts in U-4 way fabric that moves simultaneously in four opposite directions to follow the body's movements. Central zip fastening with scratch-resistant rubber button. Multi-pocket Bermuda shorts with two front pockets, two multi-purpose zipped pockets, two back pockets (one zipped, one Velcro), ruler pocket and hammer loop. The design with accentuated rear reinforcement provides greater protection for the lumbar area, while the reflective strip on the tubular loop ensures greater visibility. Breathable, quick-drying Bermuda shorts in waterproof fabric, ideal for warm weather.

UPSK139 

CURMA UNDERSHIRT

220 gsm - 57% polypropylene, 34% polyamide, 9% elastane. Thermal undershirt derived from sport. The high proportion of polypropylene makes this item lightweight and breathable, while providing optimum thermal insulation. Polypropylene, which is antibacterial by nature, is combined with polyamide to create a strong, dimensionally stable fabric. Finally, the high elasticity of this undershirt makes it very grippy, giving a "second skin" effect that is perfectly suited to all operators who work in cold environments or adverse weather conditions.

GLOVES

PROTECTIVE GLOVES - GENERAL REQUIREMENTS

EN ISO 21420

This standard details the general requirements and test procedures relating to glove ergonomics and construction, material resistance to water penetration, safety, comfort and efficiency, marking and manufacturer information applicable to all protective gloves.

EN 511 STANDARD		Protection from the cold A: Resistance to convective cold (0 to 4) B: Resistance to contact cold (0 to 4) C: Waterproofness of the glove (0 to 1) after 30 minutes immersion
EN 407 STANDARD		Protection against thermal risks A: Resistance to flammability (0 to 4): time during which the material continues to burn after being removed from the heat source (persistence of flammability). B: Resistance to contact heat (0 to 4): the user feels no pain for at least 15 seconds. C: Resistance to convective heat (0 to 4): time during which the glove is able to delay the transfer of heat from a flame, D: Resistance to radiant heat (0 to 4): time during which the glove is able to delay heat transfer when exposed to a radiant heat source. E: Resistance to small splashes of molten metal (0 to 4): quantity of molten metal required to raise the temperature of the sample (40°C). F: Resistance to large splashes of molten metal (0 to 4): weight of molten metal required to damage the artificial skin directly behind the sample (superficial burn).

100% polyester. Adjustable shoulder bag. Organised tool compartment with slots for various tools. Flap with front pocket for easy decoration access. Large main compartment to hold documents and a laptop up to 15 inches. The bag is reinforced to bear the weight of appropriate content.

BLACK / NAVY

CERTIFICATION ON REQUEST

39x21x33 cm - Capacity 27L

WKI0601

TOOL BAG WITH PLASTIC BASE

100% polyester. Polyester tool bag with plastic base. Large single opening at the top to make it easier to find tools. Side straps to ensure structure remains sturdy even with relative weight and to accommodate a spirit level. Adjustable shoulder strap.

BLACK / NAVY

47.5x27x30.5 cm - Capacity 40L

WKI0432

TOOL BAG

100% polyester. Tool bag in 600D polyester. Ideal for storing or transporting power tools and accessories. Several pockets are available for organising tools and their accessories. Consists of a reinforced shoulder strap for better support and highly resistant carrying handles with scratch fastening for a better grip. On the top, it features a large rigid opening with industrial zip fastening that makes equipment storage easier. The bottom of the bag and its feet are made from rubber for added protection and reinforcement.

NAVY / BLACK

32x19x42 cm - Capacity 26L

WKI0101

BACKPACK FOR TOOLS AND LAPTOP

100% polyester. Backpack with reinforced structure to carry all your outdoor work tools with you wherever you go. Waterproof material. Padded laptop compartment, with reinforced side structure. Padded straps reinforced with a rigid band to withstand tool weight. Compartmentalised interior panel for storing work tools. Inner pocket reinforced with a mesh structure to store fragile tools with sharp edges. Large front pocket, 100% customisable. Top handle with safety seams to make lifting the bag easier when full. Side pockets

BLACK / RED

KI0508

CAR BOOT ORGANISER WITH FLAP

Fold-out organiser in 600D polyester. Large foldable compartment with elasticated fastening and zip flap. Side pocket. Front eyelets.

CERTIFICATION ON REQUEST

36x60x31 cm - Capacity 63L

KI0507

CAR BOOT ORGANISER

Car boot organiser in 600D polyester. 2 large fold out compartments with elasticated fastening. Side pocket. Metal eyelets at the sides.

PR796
REUSABLE 3-LAYER MASK - ADJUSTABLE CORDS - AFNOR UNS1

3-layer protective mask with soft 100% woven cotton fabric. Outer and inner layer : 100% woven cotton. Mid layer : filtering non-woven fabric. Pocket for PM2.5 activated carbon filter. One size fits all. Elastics with adjustable elasticated ear loops to best fit the mask on your face. Flexible and adjustable nose bar to prevent fogging of the glasses. Non-medical. Washable at 60 degrees. Tested 20 washes. It is recommended to wear the mask for a maximum of 4 hours a day. Mask of Cat.1 first wash according to AFNOR standard, conforming to Eurofins Test CH_PCL_5. Mask of Cat.1 1-20 washes according to AFNOR standard, conforming to Eurofins Test CH_PCL_1.

PR799
ANTIMICROBIAL AND REUSABLE PROTECTIVE MASK - AFNOR UNS1 - PACK OF 5 MASKS

Soft cotton fabric, 2 layers of single jersey. Silvadur™ 930 Antimicrobial finish on outer which inhibits the growth of microbes to offer protection, durability and freshness. Zelan™ R3 / Teflon EcoElite™ water repellent finish. One size fits all with the option of two adjuster sizes to accommodate various age groups. L. 32cms X W 12cms, 160gsm. Washable to 60 degrees, so can be reused. Tested 10 washes. Non-medical. It is recommended to wear the mask for 4 hours maximum per day. Cat. 1 to first wash until 10 washes from AFNOR Norm. Report EUROFINs No° CH_PCL_4

RV004X
DISPOSABLE 3-PLY MEDICAL MASK - SOLD IN PACKS OF 50 EX

Sold in packs of 50 ex. Non-sterile, disposable, lightweight, loose fitting mask - protects against large droplets. Elasticated ear loops for comfort - Nose clip. Single use, easy disposal. In accordance with Medical Services Directive 94/32/EEC Annex VII Class 1. Standard EN 14683-2019 TYPE IIR. Fabric: 100% non-woven comprising: outer layer PP non-woven fabric, middle layer melt down non-woven filter fabric, inner layer PP non-woven fabric. RESULT Essential Hygiene products can be used in conjunction with PPE by healthcare workers but RESULT makes no assurances that they can prevent the transmission or infection of disease or viruses.

ONE SIZE

KP199

CAP WITH TRANSPARENT VISOR

260 gsm - 100% cotton. 100% cotton twill cap. 6 panels. Size adjuster with tear release fastening. Cap delivered with a semi-rigid, transparent, removable and lift-off thermoplastic polyurethane face shield, ideal as additional protection. The face shield is flexible, light and reusable. It can also be used with glasses. It can be washed with soap or other hand washing products. It helps to protect sprays and splashes but does not dispense with the barrier gestures and rules of social distancing that are essential in the fight against the spread of infections, particularly viral infections such as Covid-19. **This cap is not Personal Protective Equipment (PPE) and cannot replace it.**

20.5x12.5 cm

KI0749

DOUBLE COMPARTMENT POUCH, ONE WITH WATERPROOF FABRIC

100% polyester. Double compartment pocket in recycled 210D polyester. Ideal for carrying your masks, new or used. Contrasting zips to show which compartment has the waterproof polyethylene vinyl acetate lining where used face masks will safely stay separate. The other compartment for new masks is made of recycled polyester. For the Black pouch the used mask is put on the Red zip side and the new one on the Cool Grey zip side; for the White pouch the used mask is put on the Yellow zip side and the new one on the Dark Grey zip side. Pocket washable at 40°.

FOOTWEAR

FOOTWEAR SAFETY CLASSIFICATIONS

Safety footwear **standard EN345** is being superseded by **EN ISO 20345**. Any footwear that has been tested to **EN345** can continue to be sold, however any new designs will have to be tested to the new standard. Which standard your footwear is tested to is identified on the product information label, this is found within the boot or shoe. Highest protection, toe-caps are tested to 200 Joules. Classification S.

SB

Safety basic 200 Joule protection.

S1 SB + :

- Closed heelarea (closed shoes).
- Antistatic properties.
- Shock absorber at heel level.
- Resistant sole hydrocarbons.

S2 S1 + :

Resistance to penetration and water absorption.

S3 S2 + :

- Antiperforation sole.
- Notched outsole.

SYMBOLS GUIDE

SB		Toe protection.	CI		Insulation against cold.
P		Penetration resistance offered by a midsole.	HI		Insulation against heat.
E		Energy absorption of heel region.	HRO		Resistance to hot contact up to 300°C.
A		Antistatic footwear.	FO		Outsole resistant to fuel & oil.
ESD		Antistatic footwear. Low electrical resistance (0.1 to 1000 MQ). Prevents electrostatic build-up.	SRA		Footwear is resistant to slippage on a ceramic tiled floor with sodium Laurel sulphate lubricant.
WRU		Water penetration and water absorption resistance.	SRB		Footwear is resistant to slippage on steel with Glycerol lubricant.
WR		Water resistant footwear (code I only).	SRC		Footwear is resistant to slippage on steel with Glycerol lubricant and ceramic tiled floor with sodium Laurel sulphate lubricant.

HI VIZ

HI-VISIBILITY

EN ISO 20471

The following pictogram placed on a garment indicates adherence to the EN ISO 20471 standard.

X = Classification of the applied surface of fluorescent and retro reflective material Classes 1 to 3 (of which class 3 is the highest achievable class).

Y = Reflective strips: retro-reflective strip classification, level 1 or 2 (2 being the highest).

Classification of fluorescent and retroreflective surface:

	CLASSES 1	CLASSES 2	CLASSES 3
X	0,14 m ²	0,50 m ²	0,80 m ²
Y	0,10 m ²	0,13 m ²	0,20 m ²

EN 1150

High Visibility clothing for non-professional use.

MODERATE VISIBILITY

EN 17353

Enhanced visualisation equipment for moderate-risk situations.

Type B

Equipment visible in the dark, presence of retro-reflective material:

Type B1: Free-hanging,

Type B2: Retro-reflective material on limbs,

Type B3: Retro-reflective material on torso or torso and limbs.

ACCESSORIES - VISIBILITY FOR NONPROFESSIONAL USE

EN 13356 - CLASS 2

High Visibility clothing for non-professional use.

WEATHER RESISTANCE

EN 343

Protection against rain

Resistance to water penetration and water vapour resistance are the two main properties which are tested in EN 343.

The following parameters are used:

X = Resistance to water penetration (4 levels of which 4 is the highest achievable class).

Y = Water vapour resistance - Breathing properties (4 levels of which 4 is the highest achievable class).

Garment water and steam penetration classification:

	CLASSES 1	CLASSES 2	CLASSES 3	CLASSES 4
X	≥ 8000 Pa	≥ 8000 Pa	≥ 13000 Pa	≥ 20000 Pa
Y	Ret > 40	25 < Ret ≤ 40	15 < Ret ≤ 20	Ret ≤ 15

FIRE RESISTANCE

EN 14116

(this standard replaces EN 533)

Protection against flames.

Protective clothings complying with this standard protects users against occasional and shortterm contact with small flames.

ANTISTATIC

EN 1149

Protective clothing complying with EN 1149 offers the user a garment with electrostatic properties to reduce the risk of sparks.

"K-LOOP PROJECT" HAT

285 gsm - Hat with metal eyelets. This beanie is part of the "K-loop" project. The cotton used comes from manufacturing cut-offs from cotton clothing produced by the Kariban brand, and the KARIBAN BRANDS range. The added polyester comes from recycled plastic bottles. During the recycling process, tracers are added to the yarn as a unique digital fingerprint. The tracers have a clear tamper-proof code and can therefore unequivocally store in a blockchain all the information from the processes the yarn has been subjected to. The Aware™ tracer technology allows the end consumer to monitor the entire production process with the guarantee of a product recycled according to best practice, with no possible modifications during the process. A special label with a QR code provides access to the Aware™ platform for direct authentication of certifications using a smartphone.

RECYCLED COTTON K-LOOP PROJECT SHOPPER

285 gsm - 73% cotton/25% polyester/2% other fibers. Shopping bag in 73% recycled cotton and 25% recycled polyester. This bag is part of the "K-loop" project. With this project, Kimood is closing the circular economy loop in the strict sense of the word. The cotton used comes from waste generated in the production of cotton t-shirts for the Kariban brand, from the KARIBAN BRANDS family. The added polyester comes from recycled plastic bottles. During the recycling process, we add tracers to the thread, i.e. electronic chips containing a blockchain (storage and information transmission technology) which stores all the operations carried out on the thread. With the Aware™ tracer technology, Kimood thus allows the end consumer to monitor the entire production process with the guarantee of a product recycled according to best practice, with no possible modifications during the process. With "K-loop", Kimood is closing the circular economy loop.

K-LOOP RECYCLED COTTON BACKPACK

285 gsm - Backpack with front pocket. This backpack is part of the "K-loop" project. With this project, Kimood is closing the circular economy loop in the strict sense of the word. The cotton used comes from waste generated in the production of cotton items for the Kariban brand, and the KARIBAN BRANDS range. The added polyester comes from recycled PET plastic bottles. During the recycling process, tracers are added to the yarn in the form of viscose and ceramic filaments to act as a unique digital fingerprint. The tracers reflect light in a unique way and therefore carry a clear and tamper-proof code. This allows us to unequivocally store in a blockchain all the information from the processes the yarn has been subjected to. Thanks to the Aware™ tracer technology and associated blockchain platform, Kimood allows the end consumer to track the entire production process. This guarantees that the product has been recycled using its own waste, with no possible alterations in the process. A special label with a QR code provides access to the Aware™ platform for direct authentication of certifications using a smartphone.

KIALMA BY K-LOOP CLASSIC DOCUMENT BAG

350 gsm • 100% recycled polyester. Semi-rigid work document bag. Double gusseted inner compartment with document divider. Adjustable, removable crossbody strap. Rear pocket with strap for placing the bag in the trolley frame. KIALMA is K-loop's top-of-the-range collection of bags and accessories. K-loop products contain markers in the thread, and thanks to blockchain technology this means that the entire production chain can be traced. A special label with a QR code provides access to the Aware™ platform for direct authentication of certifications using a smartphone.

KI6101

K-LOOP ORGANIC COTTON DRAWSTRING BAG

160 gsm - 100% organic cotton. Slide fastening with thick drawstring. K-loop organic is K-loop's organic cotton collection. During the spinning process, tracers are added to the raw material: viscose and ceramic tracer filaments that act like a unique fingerprint. The tracers reflect light and therefore have a unique, unalterable code. This allows us to unequivocally store in a blockchain all the information from the processes the yarn has been subjected to. Thanks to Aware™ tracer technology and associated blockchain platform, Kimood allows the end consumer to track the entire production process. This guarantees that the product is genuinely made from organic cotton, without any possible alteration during the process. A special label with a QR code allows access to the Aware™ platform and direct authentication of certifications simply by using any smartphone.

KI6201

K-LOOP ORGANIC COTTON FLAT TOTE BAG

160 gsm - 100% organic cotton. Flat shopping bag with handles, 70 cm long. K-loop organic is K-loop's organic cotton collection. During the spinning process, tracers are added to the raw material: viscose and ceramic filaments that act like a unique fingerprint. The tracers reflect light and therefore have a unique, unalterable code. This means we can store all the information about the processes to which the yarn has been subjected unambiguously in a blockchain. Thanks to Aware™ tracking technology and its blockchain platform, Kimood enables end consumers to follow the entire production process. This guarantees that the product is genuinely made from organic cotton, without any possible alteration during the process. A special label with a QR code can be used to access the Aware™ platform and authenticate certifications directly using any smartphone.

KI6202

K-LOOP ORGANIC COTTON LARGE TOTE BAG

220 gsm - 100% organic cotton. Rectangular tote bag with large gusset. K-loop organic is the K-loop collection made from organic cotton. During the spinning process, tracers are added to the raw material, viscose and ceramic filaments that act like a unique fingerprint. The tracers reflect light in a unique way and therefore have a unique and unalterable code. All the information about the processes to which the yarn has been unambiguously subjected is stored in a blockchain. Thanks to Aware™ tracking technology and its blockchain platform, the end consumer can follow the entire production process. This guarantees that the product is genuinely made from organic cotton, without any possible alteration during the process. HAND-WOVEN CANVAS SHOPPING BAG

200 gsm • 80% cotton/20% polyester. Shopping bag made from thread from recycled materials. The bag is hand stitched using traditional looms from Bangladesh, called "tant" looms. The traditional weaving gives the canvas a distinctive and unique handcrafted look. This bag is part of the "Handloom recycled project" collection that arose from a collaboration between the Kimood brand and the HandTouch company, a member of ECOTA, a fair trade organisation in Bangladesh. This item helps support the economy of families living in remote villages of Bangladesh, and the work of women in particular, thus helping to prevent these villages from being deserted. The handles stitched along the body of the bag are made from the same canvas as the bag. There is a label inside the bag with details about the project and there is also a space for decoration to add logos and/or messages.

GLOSSARY

Legend		
		New reference, size and/or colour.
		Products available in more than 10 colourways.
		Products available in more than 20 colourways.
		Style available in mens, ladies kids and/or babies version.
		Good Deal
		Product without brand label for easy relabelling.
		Brand tag that can be easily removed.
	WASHING 60°	Machine washable up to 60° (industrial washing). Care instructions apply to textiles only. If any printing or embroidery, pls follow the recommendations of the professional screen printer or embroiderer.
	WASHING 85°	Machine washable up to 85° (industrial washing). Care instructions apply to textiles only. If any printing or embroidery, pls follow the recommendations of the professional screen printer or embroiderer.
	ENZIME WASH	Enzyme washing is a special bio-polishing treatment to make the fabrics clean, smooth, without imperfections giving a soft touch and a perfect printing finish.
LSF	LSF	(Low Shrinkage Fleece) : High quality 80% combed cotton / 20% polyester fleece with low shrinkage. The inner and outer faces of the fabric contain a continuous filament that offers excellent resistance to washing. The outer face is perfect for printing, while the inner face is extremely comfortable.
LST	LST	(Low Shrinkage Terry) High-quality French terry treated to significantly reduce shrinkage, allow perfect printing and excellent comfort.
LSI	LSI	(Low Shrinkage Interlock) High-quality interlock treated to significantly reduce shrinkage, allow perfect printing and provide excellent comfort.
	PST	(Perfect Sweat Technology) A blend of 80% ring-spun combed cotton and 20% polyester. Low shrinkage fleece. Brushed inner.
	ANTIBACTERIAL	Antibacterial treatment. Antibacterial properties that reduce unpleasant odours and bacteria. Maintains hygiene and freshness thanks to silver ion transfer. Resistant to washing at 60° and dry cleaning. Reduces washing cycles and therefore energy consumption, resulting in more durable clothes.
	PEACH SKIN	The fabric has been treated to lengthen the fibres and make it velvety to the touch.
	EASY-IRON	Easy-iron products. To retain the properties obtained by the direct treatment of the fabric, garments should not be washed or ironed at high temperatures.
	NON-IRON	Shirts that do not require ironing. Easy maintenance and crease resistance obtained by direct treatment of the fabric. Wash your shirts, dry them then wear them!
	BLEACH RESISTANT	Bleach resistant fabric.
	BREATHABLE	Breathable garment or fabric. The permeability indicated corresponds to the water vapour in grams that can evaporate from a surface of one square metre in 24 hours. The higher this figure, the more breathable the fabric.
	UV	Fabric protects against UV rays in accordance with EN 13758-2 and with a UV protection upper than 40 (UPF40+).
	WATERPROOF	Waterproof garment or fabric. The figure shown corresponds to the fabric's ability to withstand water pressure without allowing moisture to penetrate. The minimum standard is 1500 mm/m².
	WATER REPELLENT	Waterproof water repellent.

Technologies and patented textiles		
	THINSULATE®	A synthetic fiber with thermal insulation properties.
	COOLMAX®	Ultra-breathable and very light fabric, ideal for all types of training. This technology identifies areas of heat and perspiration, providing optimum temperature and perspiration regulation through air circulation.
	COOLPLUS®	Ideal for athletes! The fibre is cut in a special way to offer excellent breathability and the rapid evaporation of surface moisture. The garment does not stick to the skin, thus allowing longer exertion.
	COTON SUPIMA®	Cotton, whose fibers are more long, soft and hard-wearing than other cotton fibers. Supima® is a registered trademark and a quality guarantee for fabric made with american Pima cotton.
	LYCRA®	LYCRA® clothing is high in elasticity, allowing it to return to its original shape after stretching. This fabric also dries quickly.
	TOPCOOL®	Thanks to their special surface, TopCool® polyester fibres absorb moisture perfectly and wick it quickly outward, where it can evaporate. The skin remains pleasantly dry and the body maintains a constant temperature.
	CORDURA®	Polyamide that is ultra-resistant to abrasion.

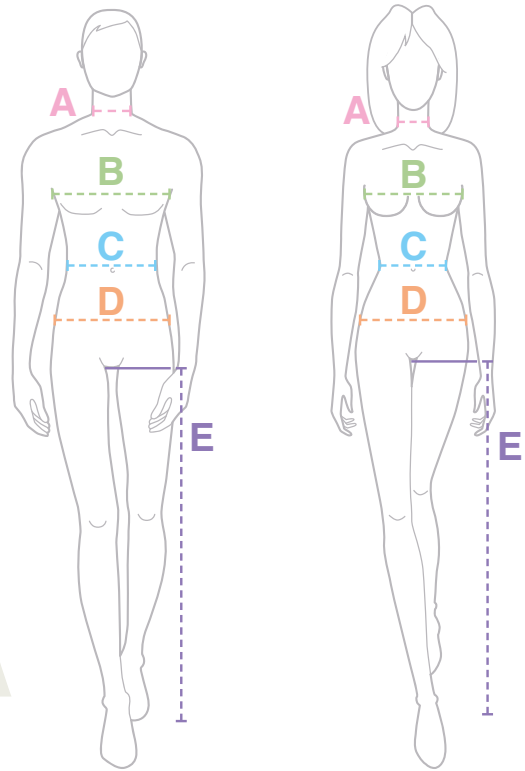

Glossary	
ANTI-PILLING	A finish that prevents fibres from separating and forming pills on the surface of a fabric. Used on fleeces to make them more resistant to washing.
ELASTANE	A generic term for yarns with superior elasticity and resistance to stretching. They allow clothing to better follow the movements of the body and maintain their original form and size for longer. Contributing to better freedom of movement, they are also hard-wearing, comfortable and crease resistant.
BACKING	The application of a plastic film (PVC, Polyurethane [PU], acrylic, etc.) on the surface of the fabric to make it more waterproof.
LYOCELL	An artificial cellulose fiber that offers increased resistance and provides a soft surface that feels like peach skin to the touch. Example: Tencel® (made from the cellulose found in wood pulp).
BREATHABLE MEMBRANE	A film that make fabric waterproof while allowing water vapour (perspiration) to pass through. Examples: Goretex®, Thinsulate®, etc.
POLYAMIDE	A synthetic material made from resistant, flexible and relatively elastic yarns, easy-care.
POLYESTER	Resistant, synthetic yarn, flexible, crease resistant, easy-care.
POLYURETHANE	Woven fabric covered with one or more layers of polymer. Product made from elastane yarns.
QUICKDRY	A breathable fabric that promotes quick drying.
RIP-STOP	Yarns and weft positioned squarely to prevent ripping.
MICROFIBER	Clothing made from microfibers to obtain a silky appearance, softness, comfort and breathability.
VISCOSE	An artificial material made from regenerated cellulose, with a silky and lustrous appearance (smooth to the touch). Also falls beautifully due to the density of the material (higher than cotton).
